Thermocouple Tips, Temperature Measuring Instruments, Samplers, Carbon Silicon Analyzer, Carbon Cups, Auxiliary Display & Other Foundry Products.

OM TECHNOLOGY

PRODUCT FOR MOLTEN METAL INDUSTRIES

COMPANY PROFILE

Om Technology is engaged in manufacturing of Thermocouple temperature measurement sensors, equipment, analyzers, spectrometer display and other products for molten metal industries. These are in confirmation to National, International Quality standards and also available in standard/customized design. Our range is in Steel Plants & foundries (Ferrous and non-ferrous).

Om Technology is a professionally managed manufacturing organization to meet the needs of Thermo couple temperature measurement equipment and sensors with its own fully equipped plant in Pune. The facility is backed up by highly skilled, experienced and professional's workforce supported and strengthened by strict quality assurance.

Om Technology has a strong In-House Research & Development team and since to date, we have depended on our own resources for product innovation & development. We believe in offering our customers 100% reliable products, dedicated services with definite price advantage.

OUR VISION

To be the most successful premium Manufacturer in the industries. Our key directive is complete customer satisfaction. Nothing can replace good quality except better quality

OUR MISSION

To proactively find and satisfy the measurement, monitoring and control needs of the molten metal processes. we will respond with innovative, value added products and services that improve our customer's quality, productivity.

PRODUCT FOR MOLTEN METAL INDUSTRIES

Thermocouple Tips

Thermocouple Tip - Mark IV

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type) / 6/30% (‘B’ Type)
- Use in Foundry & Steel Plants for production and refining processes of iron, steel and other ferrous and non-ferrous metals
- Measuring time is 3 to 8 seconds
- Usage : 1 to 3 time under slag condition also depending on application
- Contact Block Type : Mark IV, Mark VII
- Available Length 300 to 1500mm in paper tube as required according to furnace capacity
- Available with Steel/Aluminum/Copper protective cap

Thermocouple Tip - MTR

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type)
- Use in Foundry & Steel Plants for production and refining processes of iron, steel and other ferrous and non-ferrous metals
- Measuring time is 3 to 8 seconds
- Usage : 4 to 7 time in slag free condition also depending on application
- Contact Block Type : Mark IV, Mark VII
- Available Length 300 to 900mm in paper tube as required according to furnace capacity
- Available with Plastic/paper tube protective cap

Thermocouple Tip - BMD

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type) / 6/30% (‘B’ Type)/’K’ Type
- Use in Foundry & Steel Plants for production and refining processes of iron, steel and other ferrous and non-ferrous metals
- Measuring time : 3 to 8 seconds
- Usage : 6 to 10 time in slag free condition also depending on application
- Contact Block Type : Mark IV, Mark VII
- Available Length 70mm in ceramic / ceramic fiber body

Thermocouple Tip - Mark VII

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type)
- Use in Foundry & Specially for Steel Plants for production
- Measuring time is 3 to 8 seconds
- Usage : Single time under slag condition also depending on application
- Contact Block Type : Mark VII
- Available Length 300 to 1200mm in paper tube as required according to furnace capacity

Thermocouple Tips

Thermocouple Tip - Mark VII Anti Splash

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type) / 6/30% (‘B’ Type)
- Use in Foundry & Steel Plants for production and refining processes of iron, steel and other ferrous and non-ferrous metals
- Measuring time is 3 to 8 seconds
- Usage : 6 to 10 time in slag free condition also depending on application
- Contact Block Type : Mark VII
- Available Length 70, 300 to 900mm in paper tube as required according to furnace capacity
- Available with Steel/Aluminum protective cap

Thermocouple Tip – Mark III

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type) / 6/30% (‘B’ Type)
- Use in Foundry & Steel Plants for production and refining processes of iron, steel and other ferrous and non-ferrous metals
- Measuring time is 3 to 8 seconds
- Usage : Single time under slag condition also depending on application
- Contact Block Type : Mark III
- Available Length 300 to 1500mm in paper tube as required according to furnace capacity
- Available with Steel protective cap

Thermocouple Tip - SMD

- Available in : 13% (‘R’ Type) / 10% (‘S’ Type) / 6/30% (‘B’ Type)/’K’ Type
- Use in Foundry & Steel Plants for production and refining processes of iron, steel and other ferrous and non-ferrous metals
- Measuring time : 3 to 8 seconds
- Usage : 6 to 10 time in slag free condition also depending on application
- Contact Block Type : Mark IV, Mark VII
- Available Length 70mm in ceramic / ceramic fiber body

Immersion Sampler

Its provides a precision samples for spectrographic, chemical or gas analysis.

- Samplers are available in Round , Oval shape & Stepped / Twin
- Temperature Range: 1580 °C and 1720 °C.
- Paper tube size: lengths available in 300 mm, 600mm, 900mm, 1200mm, 1500mm.
- De-oxidant : Plain, Aluminum, Zirconium, Titanium
- Samples can be obtained within 5 seconds
- Protects sample chemistry from changes caused by slag or air contamination
- Zero defect samples
- Samples are easily detachable from the spoon with minimal preparation needed for analysis.

PRODUCT FOR MOLTEN METAL INDUSTRIES

Temperature Measuring Instruments

GENIUS PORT(Battery Operator)

Portable, immersion-type handheld pyrometer for fast and accurate molten metal temperature measurement. Designed for foundry and steel plant environments, delivering reliable results within seconds using advanced Plateau Detection Technology.

Key Features:

- Temperature Range: K/R/S Type – 300–1250°C / 500–1750°C
- Accuracy: ±1°C (NABL traceable calibration)
- Fast Measurement: 3–8 seconds
- Bright 4-digit display
- Battery status indication & auto power-off
- Audible buzzer for cycle completion
- Sturdy, lightweight & compact design

Optional:

Data memory (500 readings) with PC connectivity & software
Wireless model available

GENIUS M4 (Mains Operated)

Wall-mounted, mains-operated immersion pyrometer for fast and accurate molten metal temperature measurement. Designed for harsh foundry and steel plant environments, ensuring reliable performance with minimal immersion time.

Key Features:

- Power Supply: 230V AC ±10%, 50Hz
- Thermocouple: K/R/S Type
- Accuracy: ±1°C (NABL traceable calibration)
- Fast Response: 3–8 seconds
- Plateau Detection Technology for precise readings
- LED Display: 2", 4", 8" (4-digit, 7-segment)
- Relay output for hooter indication (tip connection & cycle completion)
- Rugged, wall-mountable, easy-to-use design
- Suitable for ferrous & non-ferrous metals
- Zero maintenance

PRODUCT FOR MOLTEN METAL INDUSTRIES

Thermo Lab & Carbon Cup

Thermo Lab - Carbon Silicon Analyzer

Microprocessor-based instrument for accurate carbon, silicon, and temperature analysis of molten iron. Delivers fast results with high precision, improving process control and productivity.

Key Features:

- Measures: %CE, %C, %Si in iron melt
- Temperature Range:
- Type K: 950–1370°C
- Type R/S: 1000–1767°C
- Accuracy: High precision with 40 sec analysis time
- Power Supply: 230V AC ±10%, 50Hz
- Suitable for: CI, MCI, SG iron
- Triple Display: Separate 1" displays for %CE, %C, %Si
- Memory: Stores last 100 readings (date, time, heat no.)
- RS232 interface for computer connectivity
- Inbuilt hooter for process/error indication
- Cup holding stand with K-type cable
- Low maintenance & user-friendly design
- Wireless model available

Carbon Cups

High-quality carbon cups designed for accurate cooling curve analysis of molten metal, enabling precise calculation of %CE, %C, and %Si.

Key Features:

- K-Type (Chromel-Alumel) thermocouple with ±1°C accuracy
- High precision carbon & silicon measurement
- Thick thermocouple wire for high-temperature durability
- Suitable for base iron (pre-magnesium treatment)
- Available in square & round shapes
- Compatible with all carbon-silicon analyzers
- Secure, vibration-proof electrical contact design
- Available in small, medium & standard sizes for foundry applications

PRODUCT FOR MOLTEN METAL INDUSTRIES

Auxiliary Display - Thermo Check

Thermo Check is a microcontroller-based auxiliary display designed for spectrometers, temperature indicators, and production data. Ideal for foundries and steel plants, it enables real-time display of spectrometer analysis results directly on the melting platform from the lab.

Key Features:

Compatible with any make of spectrometer
Power Supply: 230V AC ±10%, 50Hz
Rugged M.S. enclosure, wall-mountable or hanging
Wired & wireless models available
RS-485 connectivity for multiple display integration
Hooter indication for new report alerts
Dot matrix display for date, time, sample no., heat no., grade, etc.
LED element display (4-digit, 7-segment)
Models available: 10, 12, 15, 17+ elements
Display sizes: 1", 2", 4", 8"
Flashing & color indication for high/low composition status
Zero maintenance, reliable operation

Applications:

Remote chemistry display (ERD) for spectrometer analysis in foundry and steel plant operations.
